Sicherheitshinweise für mit Elektrowerkzeugen angetriebene Wasserpumpen

- Lesen Sie alle der Wasserpumpe und dem verwendeten Elektrowerkzeug beigegeführten Anweisungen und Anweisungen. Versäumnisse bei der Einhaltung der Sicherheitshinweise und Anweisungen können elektrischen Schlag, Brand und/oder schwere Verletzungen verursachen.
- Bewahren Sie alle Sicherheitshinweise und Anweisungen für die Zukunft auf.
- Halten Sie Kinder, andere Personen und Tiere während der Benutzung der Wasserpumpe fern. Bei Ablenkung können Sie die Kontrolle über die Wasserpumpe verlieren.
- Ziehen Sie vor allen Arbeiten an der Wasserpumpe oder am Elektrowerkzeug den Netzstecker aus der Steckdose.
- Schalten Sie einen Fehlerstrom-Schutzschalter (PRCD) zwischen Steckdose und Elektrowerkzeug. Elektrowerkzeuge sind nicht für den Kontakt mit Wasser vorgesehen. Der normale Fehlerstrom-Schutzschalter des Gebäudes ist keine ausreichende Absicherung gegen elektrischen Schlag (siehe Bild B).
- Schalten Sie während einer unbeabsichtigten Unterbrechung der Stromzufuhr das Elektrowerkzeug aus. Dies verhindert das unkontrollierte Anlaufen des Elektrowerkzeugs nach einer Unterbrechung der Stromzufuhr.
- Betreiben Sie die Wasserpumpe nie unbeaufsichtigt. Ziehen Sie sofort den Netzstecker und schalten Sie das Elektrowerkzeug aus, wenn Flüssigkeit austritt (siehe Bild H).
- Verwenden Sie keine regulären Düsen. Druckveränderungen können die Schläuche von der Wasserpumpe ablösen (siehe Bild G).

Konformitätserklärung CE

Wir erklären in alleiniger Verantwortung, dass das unter «Technische Daten» beschriebene Produkt allen einschlägigen Bestimmungen der Richtlinie 2006/42/EG einschließlich ihrer Änderungen entspricht. Technische Unterlagen (2006/42/EG) bei: Robert Bosch Power Tools GmbH, PT/ETM9, 70538 Stuttgart, GERMANY

Henk Becker
Executive Vice President Engineering

Helmut Heinzelmann
Head of Product Certification (PT/ETM9)

Arbeitshinweise

- Legen Sie das Elektrowerkzeug auf eine ebene Unterlage (z. B. einen Tisch) und stellen Sie die Drehrichtung des Elektrowerkzeugs immer gegen die Unterlage ein. Dadurch können sich die Schläuche nicht verdrehen.
- Halten Sie den Ablassschlauch mit der Hand fest oder fixieren Sie ihn am Behälter (siehe Bild D).
- Tauchen Sie den Ansaugschlauch vor dem Einschalten in den Behälter mit der Ansaugflüssigkeit.
- Bearbeiten Sie die maximalen Trockenlaufzeiten (siehe Tabelle der technischen Daten und Bild F). Wählen Sie daher immer einen kurzen Ansaugschlauch.

Änderungen vorbehalten.

English

Safety Warnings for Power Tool-Driven Water Pumps

- Read all precautions and instructions enclosed with the water pump and the power tool you are using. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.
- Save all safety warnings and all instructions for future reference.
- Keep children, bystanders and animals away while operating a water pump. Distractions can cause you to lose control of the water pump.
- Before any work on the water pump or the power tool itself, pull the mains plug.
- Connect a portable residual current device (PRCD) between mains socket and power tool. Power tools are not designed for contact with water. The normal residual current device of the building is not a sufficient safeguard against electric shock (see figure B).
- Switch off the power tool during an unintentional interruption of the electricity supply. This prevents uncontrolled starting of the power tool after a power failure.
- Never leave the water pump to run unsupervised. If liquid leaks out, immediately pull the mains plug and switch off the power tool (see figure H).
- Do not use variable nozzles. Pressure changes can cause the hoses to detach from the water pump (see figure G).

Declaration of Conformity CE

We declare under our sole responsibility that the product described under «Technical Data» complies with all applicable provisions of the directive 2006/42/EC including its amendments.

Fransais
Consignes de sécurité pour les pompes à eau entraînées par des outils électroportatifs

- Lisez toutes les instructions de sécurité et tous les avertissements joints à la pompe à eau et à l'outil électroportatif utilisé. Le non-respect des instructions et consignes de sécurité peut provoquer un choc électrique, un incendie et/ou entraîner de graves blessures.
- Conservez tous les avertissements et toutes les instructions pour pouvoir s'y reporter ultérieurement.
- Tenez les enfants, les personnes et les animaux à l'écart pendant l'utilisation de la pompe à eau. Ne pas vous laisser distraire car vous risquez alors de perdre le contrôle de la pompe à eau.
- Avant d'effectuer des travaux sur la pompe à eau ou sur l'outil électroportatif, retirez le câble de la prise de courant et l'outil électroportatif. Les outils électroportatifs ne sont pas conçus pour entrer en contact avec l'eau. Le disjoncteur différentiel normal du bâtiment ne suffit pas à écarter tout risque de choc électrique (voir figure B).
- Éteignez l'outil électroportatif pendant les coupures de courant involontaires. Cela écarte tout risque de démarrage incontrôlé de l'outil électroportatif après le rétablissement du courant.
- Ne jamais faire fonctionner la pompe à eau sans surveillance. Débrancher le câble d'alimentation et éteignez l'outil électroportatif dès la moindre fuite de liquide (voir figure H).
- N'utilisez pas de buses réglables. Suite à des variations de pression, les flexibles risquent de se déconnecter de la pompe à eau (voir figure G).

Déclaration de conformité CE

Nous déclarons sous notre propre responsabilité que le produit décrit sous «Caractéristiques techniques» est en tous points conforme aux exigences de la directive 2006/42/CE et ses modifications ultérieures.

Avvertenze di sicurezza per pompe per acqua azionate con elettrotensili

- Leggere per intero le avvertenze e le indicazioni allegate alla pompa per acqua e all'elettrotensile impiegato. La mancata osservanza delle istruzioni e delle avvertenze di sicurezza può essere causa di scosse elettriche, incendi e/o lesioni di grave entità.
- Conservare tutte le indicazioni di sicurezza e le istruzioni operative per ogni esigenza futura.
- Mantenere a distanza bambini, altre persone e animali durante l'impiego della pompa per acqua. Eventuali distrazioni possono far perdere il controllo della pompa per acqua.
- Prima di qualsiasi intervento sulla pompa per acqua o sull'elettrotensile, estrarre la spina di rete dalla presa.
- Inserire un interruttore salvavita (PRCD) fra la presa e l'elettrotensile. Gli elettrotensili non sono previsti per entrare a contatto con l'acqua. Il normale interruttore salvavita dell'edificio non offre sufficiente protezione dalle folgorazioni (vedi figura B).
- In caso di interruzione imprevista dell'alimentazione elettrica, spegnere l'elettrotensile. Ciò impedirà il riavvio incontrollato dell'elettrotensile stesso dopo l'interruzione di alimentazione.
- Non utilizzare in alcun caso la pompa per acqua senza che sia sorvegliata. Estrarre immediatamente la spina di rete e spegnere l'elettrotensile in caso di fuoriuscita di liquido (vedi figura H).
- Non utilizzare ugelli regolabili. Le variazioni di pressione possono far distaccare i tubi flessibili dalla pompa per acqua (vedi figura G).

Dichiarazione di conformità CE

Dichiaro sotto la nostra piena responsabilità che il prodotto descritto nella sezione «Dati tecnici» è conforme a tutte le disposizioni pertinenti della Direttiva 2006/42/CE e relative modifiche.
